

A universal BI support for analytical, planning and decision processes on all management levels for small and medium-sized companies. Our BI solution can quickly process exact and actual information, as well as to work with ad-hoc inquiries. All information about the actual state of key company indicators is available on the main screen. With one click, one receives an overview about the past indicator development and future predictions.

You still don't have a BI solution?!

REFERENCES

Doosan Škoda Power

A traditional provider and producer of technologic tools has been supplying clients with gas turbines for energy production since 1904. The company is a member of the Doosan Power Systems group. It delivers clean and ecologic technologies, products and services related to electricity production.

„This system not only creates managing arrays, it also provides us with a quick overview about projects in respect to the income statement, work capital and the actual cash-flow. The transparent analytical tool gives us the necessary detail and enables inquiries creation which lightens and speeds up our work.“

Lucie Rybárová

Controlling Manager
Doosan Škoda Power s. r. o.

Technologies
